

**BOLDLY ADVANCING  
THE ENTERTAINMENT  
EXPERIENCE**

**ROBIN HOOD**

### **ROBIN HOOD BENEFIT 2016**

A great blend of our audio and video services were in play at the 2016 Robin Hood Benefit. Our Cohesion System allowed for uniform audio coverage throughout the venue. Our extensive work with touring musical artists allowed for seamless integration into the evening's festivities and our video expertise and gear contributed to the visual success of the evening.

### **STRIVING TO EXCEED EXPECTATIONS**

Those who produce the Robin Hood Benefit year after year know that our dedication to providing the top technical solutions and crew makes a world of difference. Our depth, resources and experience allow us to face challenging situations head on and pull off things that had been perceived as unlikely to be possible. Our ability to deliver for our clients lets our clients deliver to their audience, which results in a spectacular experience.

**"The partnership with Clair for Robin Hood has been amazing. The combination of great service and project management with Josh Flower and the new Cohesion speaker system made for a great partner. The show returned to an in-the-round format this year after an eight year hiatus. New weight restrictions being enforced made the previous plan untenable. The CO-8 speakers were the only viable option for the PA in the dining area. The CO-12's for Usher also allowed us to fly the PA instead of ground supporting it as we had in past years."**
